

Dear Customer,

VOIPLI is greeting you for joining the 078 service. You are now able to **make Free-of-charge calls** to every member of the service around the world, and enjoy VOIPLI's low costs for local and international calls

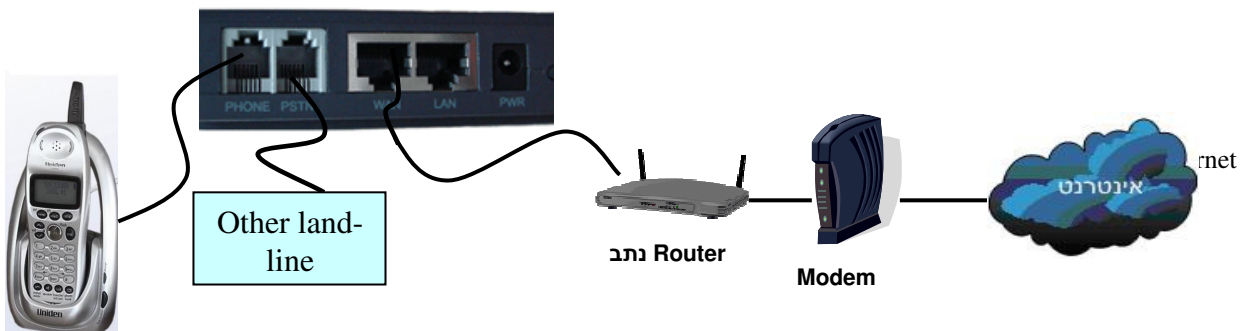

Installation:

1. Plug in the electricity transformer you received to the PWR jack
2. Plug the Router to the WAN port, using the network cable you received
3. Connect a standard Phone device to the PHONE entrance, using the phone cable you received.
4. As soon as the SYS and POWER lights are on the device is ready for use.

Installing the Device combined with a regular phone line:

If you still like to use your Bezeq Line (or any other land line) managing both is possible. In order to manage both lines, **please follow instructions 1-2 of the last paragraph, and proceed:**

1. Plug your phone device to the PHONE port.
2. Connect the other land line to the PSTN port
3. As the PWR and SERVER lights are on the device is ready for use.
4. When you pick up your phone and hear a dialing tone, that's your VOIPLI line.
5. If you wish to dial from your land line, press 9 and continue dialing as usual

Using the device:

Local dial in Israel:	Dial the whole number, including the area code (for Example 02/04)
Dialing abroad:	Dial 00 + the country area code + the phone number, dropping the leading 0
Free dialing to VOIPLI members	Dial the direct phone number of the member without the 078
For technical support	Write to : support@voipli.net and mention your Usre ID number (attached with a sticker to your device)

Tip: to speed the dial press # at the end of the phone number you wish to talk to

Account managing:

Please refer to www.voipli.net and enter your UID and Password numbers. Those details are attached with a sticker to your device. Among the services you may find on our site are: call and costs detail records, Web call-back service, Follow me etc.

Voice mail service:

From a different device: Dial your 078 phone number, enter your password and follow the instructions.
From your Voipli line (Phone device or Softphone): Dial *0# and follow the instructions.

Virtual dialing:

It is possible to make calls from the PC, using the Softphone program. To download the program from our site, please see www.voipli.net, and choose "Products".

Best Regards, **VOIPLI**
